The Rise and Spread of Humanity

Foundations of Civilization 1

Note: all of the following information in addition to your reading is important.

The Impact of Change
 Define: Pangaea –
 Printly discuss the theory of continental duit and the esions of plate testonics
 Briefly discuss the theory of continental drift and the science of plate tectonics -
Define: Homo sapiens; discuss when and where emerged –
Natural Influences on Over Engineering
 Natural Influences on Our Environment Define: glacial and interglacial periods; describe the impact they had on the
 physical environment –
 Describe the impact of the Mount Toba
explosion and how it caused a bottleneck –
Bottleneck severely reduces
 Former population size New population and population genetic diversity
 Define: natural selection –
Define. Initiatus selection
Briefly discuss the importance of understanding processes and patterns –
 Define: Paleolithic, and hunter-gatherers
Defined Faceballey and Facilities garderers
Define: migration, and explain why people stayed within their kinship links

Define: division of labor, and describe how hunter-gatherers utilized this –
Define: voluntary migration, and briefly explain how this is a result of push and pull factors –
Hypothesize how global climate change and population growth caused humans to migrate –
Briefly discuss human migration across the planet
Describe THREE innovations during the Paleolithic era
CODENIAND.
NORTH AMERICA NORTH AMERICA Neanderthal Swentscome Seinheim Alkuntra Allantra ATLANTIC OCEAN OCEAN OCEAN PACIFIC OCEAN AFRICA Omo River Hakar
POLYNESIA PACIFIC OCEAN Sterkfordein Patterns of human expansion Glaciated areas in the Old Stone Age Sites of modern human beings (Homo sapiens sapiens) Sites of humanlike ancestors (Australopithecus) Sites of early human beings (Homo habilis, Homo erectus, Homo sapiens)
Notes:
